

ban the tours because of danger, noise and pollution. We do not need the gasoline affecting the park and its air/water/soil/wildlife and birds. We do not need the noise associated with these flights. We do not need the danger involved where a pilot can be on drugs or drink or the equipment can be maintained poorly. this trend has accelerated far too much and now represents a real intrusion into our parks, which are already in bad shape. I think we should ban this tour business in mt rushmore.
